

# Company Profile

**BlueDot Drilling**  
RESIDENTIAL BOREHOLES

## Residential & Commercial Boreholes in Gauteng

Over **150** successful boreholes drilled in Gauteng

Trusted in **Gauteng**  
for boreholes that  
***save costs*** and  
provide lasting  
water security

## Who We Are

**Blue Dot Drilling provides Gauteng homes and businesses with reliable borehole water solutions using our own rigs, from drilling to pump installation.**

Blue Dot Drilling provides residential and commercial properties in Gauteng with complete borehole solutions. We own our own drilling rigs, including compact machines that fit into driveways and gardens, and can drill up to 150m deep.

Our team handles everything from site inspection and drilling to yield testing and pump installation. By working directly with us, you get a cost-effective, reliable water supply without relying on municipal services.

# Our Services

BlueDot Drilling offers a **complete borehole solution**, from choosing the best spot to drill through to water flowing into your tank. These are the main services we provide:

## Site Inspection

# 1

## Borehole Drilling

# 2

## Water Testing

# 3

## Pump & Tank Installation

# 4

## After-Sales Support

# 5

# Services Details

## SITE INSPECTION

- Assess property layout
- Check rig access
- Identify best drilling spot
- Prepare site for safe installation

## BOREHOLE DRILLING

- Compact rigs fit into tight spaces
- Drill depths up to 150m
- Suitable for driveways and gardens
- Access clean, reliable water

## WATER TESTING

- Test flow rate of borehole
- Check water quality
- Confirm sustainable supply
- Ensure household or business needs are met

## PUMP & TANK INSTALLATION

- Install correct pump size
- Fit storage tank and pressure system
- Connect to household or irrigation lines
- Guarantee long-term water performance

## AFTER-SALES SUPPORT

Our team provides ongoing maintenance and servicing to keep your borehole working at its best. From annual water testing to pump replacements, we ensure your system continues to perform reliably over time.

- Annual water testing
- Pump servicing and replacements
- System maintenance
- Keep borehole running reliably

**“Your borehole stays working long after the drilling is done.”**

# Why Us

**Drilling a borehole in Gauteng comes with unique challenges. Here is why property owners choose Blue Dot Drilling:**

## **TIGHT PROPERTY ACCESS**

Most Gauteng homes and businesses do not have big open plots. Our compact rigs fit into small driveways and backyards without damaging paving or gardens.

## **GAUTENG WATER TABLE KNOWLEDGE**

We know the average drilling depth in Gauteng is 40m–70m, and we plan accordingly. This reduces wasted drilling and gives clients realistic cost expectations before we start.

## **SUSTAINABLE SUPPLY**

Subtract your expenses from your income. What do you have left over? That's your surplus! You can use that surplus to pay down debt or save towards retirement.
