Welcome to BRH Engineering

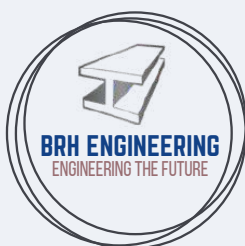

6 Nikkel Street, Shop 6, Capital Industrial Park, CE6, Vanderbijlpark

BRH Engineering welcomes you to a company built on precision, skill, and dedication. We specialise in welding, fabrication, and the installation of piping systems, vessels, and industrial structures.

Our team brings years of technical expertise, ensuring that every project we take on is completed with safety, compliance, and unmatched workmanship.

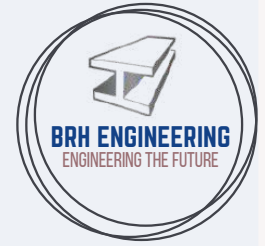

We are proud to serve industries that demand reliability and high standards, from petrochemical plants to construction and manufacturing sectors.

RENIER BOOLSEN

Founder

About Us

BRH ENGINEERING (PTY) LTD

BRH Engineering is a proudly South African company established to provide specialised welding, fabrication, manufacturing, and industrial maintenance solutions to clients in the engineering, petrochemical, mining, and construction sectors.

Located in Vanderbijlpark, Gauteng, our workshop is fully equipped to handle the most demanding projects, from the installation of pressure-rated piping systems to the repair and certification of industrial vessels.

QUALIFIED ARTISANS

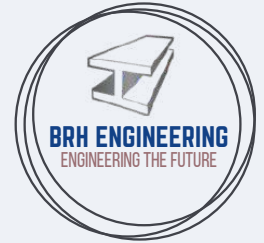

Our team is made up of qualified artisans, coded welders, and experienced supervisors who bring precision, safety, and efficiency to every project. We specialise in Mild Steel, Stainless Steel, and specialised alloys, offering tailor-made welding and fabrication services that comply with South African and international standards.

OUR COMMITMENT

We are committed to safety, compliance, and client satisfaction. Every project is completed with a strong emphasis on:

- Meeting statutory requirements and industry codes.
- Ensuring safe work practices under Occupational Health and Safety Act (OHS Act) compliance.
- Using skilled, accredited personnel who undergo regular refresher training.
- Delivering workmanship that stands up to audits and inspections.

Mission and Vision

OUR MISSION

To provide reliable welding, fabrication, and industrial maintenance solutions that meet the highest safety and quality standards while building lasting relationships with our clients.

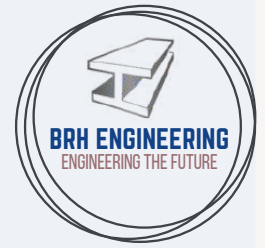

Our Vision

To be a trusted leader in welding and engineering solutions across South Africa, recognised for precision, safety, and reliable service.

Values

- **Safety** – Protecting our people, clients, and worksites.
- **Quality** – Delivering workmanship that meets global standards.
- **Integrity** – Acting with honesty and accountability.
- **Reliability** – Completing projects on time and within scope.
- **Growth** – Developing skills and creating opportunities in our community.

Our Services

WHAT WE DO

At BRH Engineering, our services are built around two core categories that define our work.

The first is Specialised Welding, where we provide expert welding solutions using advanced techniques and certified materials.

The second is Fabrication, Maintenance and Installation, which covers the design, manufacture, repair, and installation of piping systems, vessels, structures, and platforms.

Together, these categories allow us to support clients with complete engineering solutions, from precision welding to large-scale industrial projects.

1. SPECIALISED WELDING

Our welding division focuses on delivering precise, high-quality welding solutions using methods such as TIG, MIG, and Arc welding.

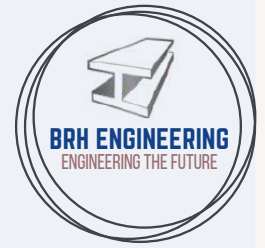

We work with a range of materials including Mild Steel, Stainless Steel, and special alloys, ensuring durability and compliance with international standards. Whether for structural projects, piping, or vessels, our welding expertise guarantees strength and reliability.

2. FABRICATION, MAINTENANCE & INSTALLATION

Our fabrication and installation services cover piping systems, vessels, and industrial structures.

We manufacture and repair equipment in line with SANS and ASME codes, ensuring safety and performance. From new builds to maintenance work, our solutions are built to last and tailored to each client's needs.

Specialised Welding

PRECISION WELDING

We deliver neat and accurate welds that ensure your equipment and structures are safe, durable, and fit for use.

VARIOUS WELDING METHODS

We use various welding techniques suited to the project, whether it is for light materials or heavy industrial work.

WIDE RANGE OF MATERIALS

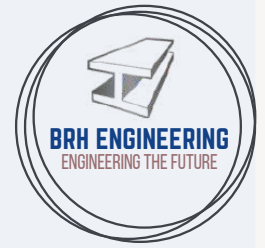

We work with Mild Steel, Stainless Steel, and other alloys, making sure the right welding solution is applied for your needs.

CERTIFIED QUALITY

We follow recognised standards and safety rules so that every weld passes inspection and meets client requirements.

Fabrication, Maintenance & Installation

INDUSTRIAL PIPING

We design and install piping systems in Mild Steel and Stainless Steel to handle your industrial flow needs safely and efficiently.

VESSELS AND PRESSURE VESSELS

We manufacture and repair vessels that meet strict safety standards, making sure they perform under high pressure and tough conditions.

STRUCTURES AND PLATFORMS

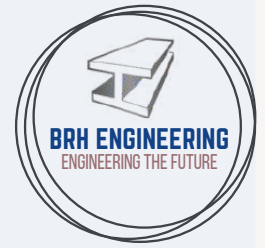

We build strong support structures and access platforms that improve safety and functionality in your work environment.

MAINTENANCE AND REPAIRS

We provide reliable maintenance and repair services to extend the life of your equipment and reduce downtime.

Why Choose Us

At BRH Engineering, clients trust us because we focus on quality, reliability, and safety in every project.

We deliver work that lasts, finished on time, and backed by maintenance that keeps your operations running.

1

Work That Passes Inspections

We know that pressure vessels, piping, and structures must comply with strict standards like SANS 347 and OHS Act requirements. Our work is done right the first time, so you avoid failed inspections, rework, and costly downtime.

2

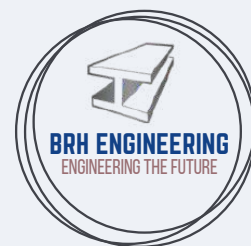

Reliable Turnaround on Projects

We plan properly and bring the right team to site, which means your shutdowns, installations, or repairs are finished within the agreed timelines. This saves clients money and keeps production on schedule.

3

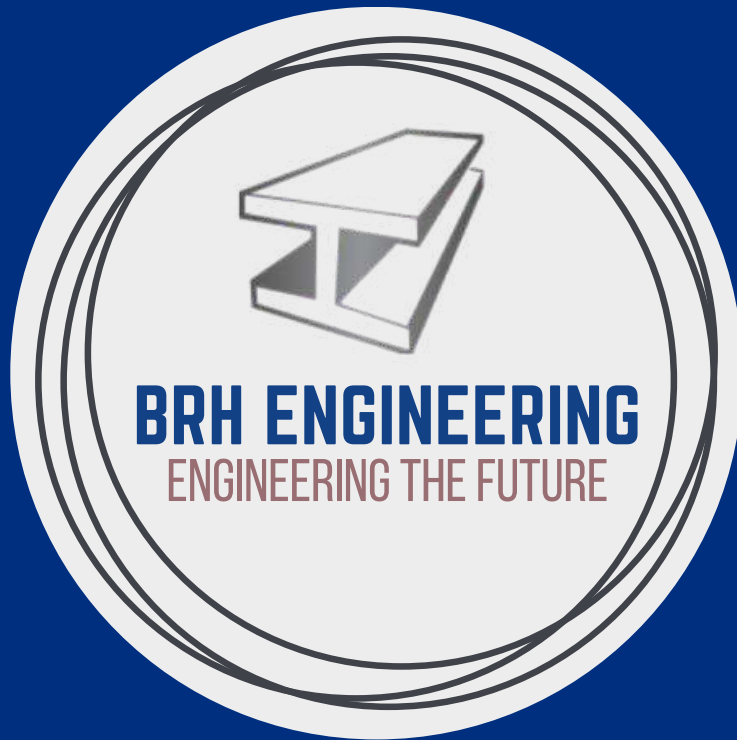

Ongoing Maintenance and Repairs

We stay involved with maintenance and repair support. This prevents breakdowns, extends the lifespan of your equipment, and ensures fewer interruptions in your operations.
